

Jyotish (Vedic Astrology)

Consultations in Santa Fe, NM

Astrology is called Jyotish in Sanskrit, meaning “science of light.” Jyotish is the science of understanding the subtle influences that come to us from the universe. These influences are a reflection of the law of *karma*. Here, both fate and free will operate. Fate means that our present circumstances are a result of our actions from previous lives. The external events of our lives are ruled by past *karma* - over this we have little control. Free will means that our future is shaped by our actions in the present.

A basic principle of Jyotish is that *sadhana* (spiritual practices) help neutralize the effects of *karma*. The main *upayas* (remedial measures) of Jyotish are also spiritual and consist of ritual, mantra and meditation. Propitiation of the planets through *puja* (ritual worship) and other prescribed measures is an integral part of Jyotish.
